

RST-1000

Footprint (operating):
56" x 75" (143 x 191 cm)
Applications:
School zones,
Police enforcement zones

Lower height and wide viewing angle allow for greater visibility in low-speed residential areas.

RST-2000

Footprint (operating):
75" x 112" (191 x 285 cm)
Applications:
All road construction sites - LED display at 7 ft. height (MUTCD)

Greater height and wide viewing angle allow for maximum visibility in high-speed applications.

RS-1000/RST-2000 FEATURES

- Truly solar powered – continuous uninterrupted operation
- Retractable Tongue – (RST-1000 only)
- Brightest, most visible display – legible under all conditions
- Onboard programmable control console with sign panel failsafe system
- Heavy-duty all steel frame construction
- Sturdy polyethylene fenders and lockable battery compartment
- Torsion-type suspension for a smooth ride
- Four (4) 3000 lb. swivel jacks and tongue jack for easy leveling and setup
- Fold down sign for ease of towing (RST-1000 only)
- Top mounted solar array for optimum performance and efficiency
- Recessed taillights and retro-reflective decals
- **BEST Warranty on the market**
 - One year - overall
 - Two years – electrical and electronic components
 - Three years – standard display modules
 - Five years – optional Mega-Flux display modules
 - Ten years – solar panels

SILENT ADVISOR

LED FULL MATRIX DISPLAY

- 18" character height.
- 7 ft. height on RST-2000 (ground to bottom of display).
- Weatherproof display case.
- Quick, easy display module replacement.
- Optional Mega-Flux Display.
- 3 digit display

OPTIONAL MEGA-FLUX LED DISPLAY

Brightest, Widest Angle Display Available

Patented secondary optical lens attaches directly to LED.

60° lenses for greater legibility

Improved Durability and Reliability

4 lead square package and 50% thicker circuit board provide increased strength.

Warranted for Five Years

PROGRAMMING FEATURES

- User-Friendly Menu Driven Programs
- Four Levels of Password Protection
- Quick Programming
- Multilingual LCD Display
- Calendar/Clock Auto Programming
- Cellular Remote Ready
- Free Software Upgrades

CUSTOM CONTROL CONSOLE

Integrated Design

Control console stores vertically.

Waterproof Control Panel with Illuminated LCD Display

LCD display features 8 lines x 40 characters with graphics.

Lighted Keyboard for Night Use

Keyboard lights up when touched and turns off automatically five minutes after the last keystroke.

"Auto Track" Display Intensity Control

Integrated photocell senses ambient light level and automatically adjusts display intensity to maximize contrast and energy efficiency.

Two Year Warranty
